PROFILE

Versatile software engineer with a Bachelor's in Computing and Software Development, nearly 3 years of industry experience, and a strong focus on problem-solving. Skilled in QA, development, and DevOps, with contributions at T-Mobile generating significant revenue. Google Certifcations in cybersecurity. Passionate about continuous learning, pair programming, and thriving in collaborative environments.

EMPLOYMENT HISTORY

Jun 2021 — Mar 2024

Software Engineer / QA Analyst / Devops, T-Mobile
Bellevue

- Worked on an internal tool to streamline processes and improve efficiency.
- Contributed to the development and maintenance of point of sale applications.
- Played a key role in generating millions of dollars in revenue through enhancements and optimizations of point of sale applications.
- Gained experience in various roles, including QA analyst, developer, and DevOps.
- Utilized problem-solving skills and adaptability to contribute effectively to team projects.
- Demonstrated proficiency in various programming languages and technologies relevant to the projects.
- Collaborated with cross-functional teams to design, develop, and deploy software solutions.
- Implemented new features and resolved bugs to enhance user experience and system functionality.
- Conducted code reviews and provided feedback to maintain code quality and best practices.
- Automated deployment processes and improved CI/CD pipelines to streamline development workflows.
- Participated in agile methodologies, including sprint planning, daily stand-ups, and retrospective meetings to ensure project progress and team alignment.

EDUCATION

Apr 2020 — Jun 2022

Bachelors of Science, Lake Washington Institute of Technology
Kirkland

- Developed a strong foundation in software engineering principles and practices.
- Gained proficiency in various programming languages and technologies, including low-level programming with C.
- Completed coursework in algorithms, data structures, software design, and system development.
- Prepared for diverse roles in the technology industry through comprehensive training and practical experience.

Apr 2024 — May 2024

Cybersecurity Certificates, Google by Coursera
Online

- Learned about key topics such as network security, cryptography, and risk management.
- Developed practical skills in identifying and mitigating security threats and vulnerabilities.
- Prepared for entry-level roles in cybersecurity by building a solid understanding of industry standards and best practices.
